CEASEFIRE X PLUS ADDRESSABLE FIRE ALARM SYSTEMS

The revolutionary Ceasefire X Plus Addressable Fire Alarm Systems are the best in class detection and alarm system to safeguard the fire safety of a large premises.

As the name suggests, these systems are addressable systems i.e. each detector & device is connected on an addressable loop.

Identity of each of the device is stored as a unique address in the panel.

In case of a fire incidence the panel identifies and displays the exact location of the device that gone-off.

This enables the fire fighter to track down the precise point of fire incidence so that there is no delay in fire fighting.

This systems is an ideal fire detection & alarm system for large premises that spread over a vast area.

An intelligent fire alarm system that comes with an easy user interface and flexible configurations to suits varied type of applications.

CEASEFIRE X PLUS PRO-SENSE : CONVENTIONAL FIRE ALARM SYSTEM

PRO-SENSE
Conventional Control Panel

The Ceasefire X Plus Pro-Sense Conventional Fire Alarm System is a time-tested and one of the most reliable system for ensuring fire safety of a premises.

This system divides the premises into distinct zones. Each zone has its own set of detectors & alarm devices.

These field devices within each zone are wired on a dedicated circuit.

On being triggered, the panel is able to identify the circuit that contains the triggered device/devices and thereby indicate the zone from where the fire alarm has come from.

The indicated zone can then be manually searched to locate the triggered device.

Pro-Sense is an ideal fire alarm system for small facilities where the expectation from fire alarm solution is to detect fire and raise an alarm.

A technically advanced conventional fire alarm system that is adept at turning a premises into a secured space.
