

**Fights fires anywhere,  
everywhere.**

# Bike Mounted Watermist Fire Extinguisher

## Portable. But powerful.

A fire can start anywhere, at anytime. And in just 6 minutes, it can turn into an uncontrollable blaze. This makes it even more important for you to tackle the fire, before it's too late.

Unfortunately, tiny lanes, inaccessible roads and traffic jams all are a setback when it comes to rushing to the rescue. Which means that by the time the fire engine reaches the scene of the fire, it could very possibly already be too late.

The need of the hour is a fire engine that can manoeuvre any road, zip through traffic and reach the burning premises in minutes.

Ceasefire introduces a state-of-the-art extinguisher on wheels – The Mobile Firefighter. Powered by the world's most revolutionary firefighting technology: Watermist.

### Watermist technology and how it works.

Ceasefire's patented Watermist technology uses the world's oldest, most effective fire suppressant – water, increasing its power many times over.

Here's how. Ceasefire extinguishers equipped with Watermist break water down into a fine mist. This mist is then thrown at the fire with a great kinetic force, covering a large

surface area. As soon as the mist comes into contact with the fire, it instantly turns into steam. Enveloping the flames, cutting down the oxygen supply and reducing the temperature and to below combustion levels. Ensuring that even the largest fire succumbs to Watermist technology. In minutes.

## The power of the Ceasefire Mobile Firefighter.

With Ceasefire's Mobile Firefighter on your side, you can arrive at the scene of the fire in minutes, and keep even the largest fires under control until the fire engines and more help arrives. These unique 9 litre extinguishers, with an extendable hose, can be mounted onto almost any bike.

To add to its firefighting capabilities, two spare containers are also attached. Increasing the power of this firefighter by four!

# What makes the Mobile Firefighter formidable?

The Ceasefire Mobile Firefighter is equipped with a host of features:

The power to tackle A, B, C and electrically started fires

Extinguishing media of clean water or water with enhancement agent

Special AFFF Foam extinguishing enhancement agent

2 Spare Containers

Customised Stand

2 Backpacks - 9 Ltr.

Apart from the benefits of speed and Watermist technology, the Mobile Firefighter also brings with it a First Aid kit - which means that you can save lives even before help appears on the scene

Windshield with logo

Blinking Lights

Hooter

Fixtures

## Recommended Usage Areas

- Hospitals
- Healthcare facilities
- Telecom facilities
- Petrol pumps
- Genset areas
- Paint factories
- Chemical factory
- Cosmetic factory
- Railways
- Aircraft hangers
- Ship building yards
- Factories with high class B risks
- Large workshop and factories

Available on DGS&D Rate Contract No. WMC FFS/MB-2/RC-NC000000/0214/069/05859/0421, dated 08th Oct. 2013

## Technical Features: 9 Litres

|  |  |
|--|--|
| <b>Fire Class</b>                      | 55A, 233B with standard foam & Electrically started fire                           |
| <b>Extinguishing enhancement agent</b> | 6% Standard AFFF Foam (UL162)  |
| <b>Compressed Air Cylinder</b>         | 4.7 Litre 300 bar carbon composite cylinder mounted on a universal cylinder holder |
| <b>Media volume</b>                    | 9 litres   |
| <b>Working pressure</b>                | 8 to 9 bar   |
| <b>Pressure Vessel</b>                 | Stainless Steel Vessel   |
| <b>Length of Hose</b>                  | 1.3 Meter  |
| <b>Weight of fully charged system</b>  | 26 kg Approx.  |
| <b>Extinguishing Gun</b>               | Stainless Steel, Approx. 1.60 kg   |
| <b>Lancing Distance of Gun</b>         | 13.2 Meter Average   |
| <b>Functional temperature range</b>    | +5 degrees C to +60 degrees C  |
| <b>Extinguishing media flow</b>        | 0.42 to 0.45 L/sec.  |
| <b>Operating Time</b>                  | 20 - 23 sec.   |

## Technical Features: 10 Litres

|  |   |
|--|---|
| <b>Capacity (size)</b>   | 10 Ltrs. (As per EN 3-7 :2004+A1:2007)  |
| <b>Working Pressure</b>  | 31 Bar  |
| <b>Water Cylinder - construction</b>   | Aluminum Alloy  |
| <b>Back pack harness</b>   | The harness system is made out of synthetic fire resistant material confirming to IS 15758(Part4) and provides minimum stress and fatigue to the wearer thanks to its ergonomical design. |
| <b>Air Bottle</b>  | 2 liters/200 bar of Mild Steel with PESO Approval and EN Certified Pressure Gauge   |
| <b>Total weight</b>  | 25.65 Kg Max  |
| <b>Operating - temperature</b>   | Minimum +5o to maximum +60o Celsius   |
| <b>Gun - construction</b>  | Stainless Steel Body weighing 814 Gms +- 2 Gms  |
| <b>Hose Length</b>   | 13.2 meters.  |
| <b>Jet - Maximum Discharge duration Continuous and at full throttle Distance</b><br>40 to 42 seconds   |   |
| <b>Fire extinction - suitability with standard AFFF 6% confirming to IS 4989 or UL 162 standards</b><br>Class - A Fires: 55A Class - B Fires: 233B<br>Class - B Polar Solvent Fires<br>Live Electrical fires - 1000 V as per EN 3-7:2004+ A1:2007 Tested for 35 kV Certified by ERDA |   |
| <b>Product Certificates</b><br>Certification from NABL accredited Lab and/ or any Central Govt. Lab. (tested in Indian condition) as per EN 3-7:2004+A1:2007 (tested within last 36 months). Test report shall be enclosed along with the offer.                                     |   |
