Wireless Fire Alarm Systems

that do more than just raise the alarm.

Ceasefire Wireless Pro System

The First Sign of Fire

Smoke is the first clear indicator of a fire. When a fire strikes at the lower levels of a building, the upper floors and escape routes can become contaminated with smoke very quickly, usually in less time than it takes to evacuate the building. The sooner the source of smoke is detected, the easier it gets to spot and fight a fire. Ceasefire's state-of-the-art wireless photoelectric and standalone smoke detection systems give you the critical time window required for effective firefighting and safe evacuation, preventing extensive damage to your property and saving precious lives.

And then they go beyond.

Wireless Fire Alarm Systems go Pro

Wireless Control Panel

Ceasefire introduces Pro Wireless, a wireless fire alarm system designed to take detection to a whole new level. The system is governed by the Pro Control Panel, a panel fully capable of automatically collecting data from the various sensors. The very instant a fire is detected, the detectors wirelessly talk to the Pro Panel, which in turn triggers a response, raising the alarm and displaying the exact location of the threat on the LCD screen.

Then, it takes a technological leap. The Pro Panel allows a 24x7 connection with strategically placed wireless cameras that capture every moment. These cameras become your eyes on the scene, letting you stay connected with the goings-on on your premises. When a threat is detected, the Pro Panel's SecureSoft software instantly dispatches an SMS, an email, and an MMS to you, with footage captured from the wireless camera both before and after the time the system is triggered. It even gives you full access, allowing you to log on from any remote server, no matter where you are, to check on your premises and program the system.

It's this Pro Panel that makes the Ceasefire Pro Wireless Fire Alarm System the most hi-tech system in the world.

- 30 zones (28 wireless + 2 wired zones)
- Each protected zone is identified by number and by name
- 16-character Liquid Crystal Display (LCD)
- Access from any remote server in the world
- Signal range of up to 100 metres (standard test conditions)
- Real-time clock
- Reporting via SMS, MMS and email
- Battery supervision
- Up to two Wireless Sirens
- Backlit keypad
- Real-time clock with 100 Event Log
- 2-way voice communication
- Diagnostic test
- 85dB alarm
- Internal GSM dialer
- Built in Powerlink
- EN & CE certified and UL listed

Wi-Fi Camera

The Ceasefire Pro Wireless Systems Wi-Fi Cameras stay on guard 24x7, giving you constant remote access to your premises. Its flexible mounting allows for installation wherever required. Featuring high-quality image resolution and focus lens capabilities, they keep an eye on all entries and exits and stand alert, ready to record the first signs of danger, ensuring a link between you and your premises at all times.

- Aesthetically pleasing, sports a modern, stylish look
- Wi-Fi connectivity promotes ultimate placement freedom
- High-quality, 320x240 image resolution
- Focus lens capability from 20 cms to infinity
- Easy setup and installation with an auto configuration feature
- All mounting hardware for table top, wall or ceiling mounting included
- Powered by AC wall outlet
- Built to Ceasefire's high standards, which are in compliance with international quality standards

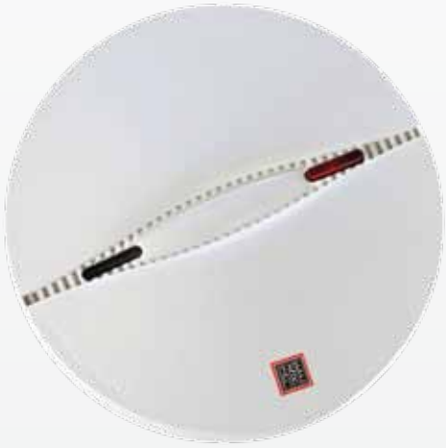
Ceasefire Wireless Siren

The Wireless Siren is a device which sounds a 98dB alarm (away from the Control Panel which has an in-built alarm). It gives you the option of having sound alerts at more than one location, covering a larger area and also affecting a louder alarm. Up to 2 Sirens can be attached to one Control Panel.

- Fully wireless
- Easy-to-install
- Double plastic cover for extra protection against the elements
- Extremely loud 98dB alarm
- Rechargeable battery pack
- Optional strobe light feature when alarm is activated
- Triple tamper protection, with three hidden switches
- EN Conforms to EN standards

CEASE FIRE

Ceasefire Smoke Detector



The Ceasefire Smoke Detector is a fully supervised wireless photoelectric smoke detector that is compatible with the Pro Wireless Panel. Designed for a wide range of residential and commercial applications, this detector is easily installed and has a streamlined design. Wireless Smoke Detectors are designed to detect smoke produced by a fire. Based on photoelectric technology, they're sensitive to the accumulation of dirt on the sensor and in response to such an occurrence, a maintenance event is generated, indicating sensor problems. This self-diagnostic capability significantly enhances detector reliability, ensuring it can alert the Control Panel as soon as it detects even the tiniest trace of smoke.

- Long battery life
- Loud (85db) alarm sound at 3m (10ft)
- Sound and transmitted alerts (smoke, tamper, low battery)
- Audio and visual sensitivity degradation indicators notify when the sensor needs to be cleaned
- Back tamper
- Ceiling mounted
- Ultra sensitive photoelectric device senses smoke in the 0.33 micron range
- Audible maintenance warning
- EN14604 EN54-5 Fully certified by the most strict and demanding international standards such as EN14604, EN54-5 for safety products in Europe

Ceasefire Wireless Repeater

The Wireless Repeater is designed to relay digital data between wireless PowerCode transmitters and a target PowerCode receiver. Repeater links are required when the target receiver is beyond the range of at least some of the wireless transmitters and is therefore incapable of receiving transmissions directly.

If the distance between the transmitters and the target receiver is too large to be covered with one repeater, several auxiliary repeaters may be added along the communication path. This way, a multi-level network is created. Up to 16 auxiliary repeaters can be positioned between the farthest group of transmitters and the target receiver. A receiver module, a transmitter module and a controller motherboard are the building blocks of the Repeater.

- Extends communication range between a PowerCode receiver and transmitter
- Supports PowerCode wireless panels and receivers
- 16x Up to 16 repeaters can be used in a system
- CE Conforms to CE standards
- PowerCode ID factory-selected from 16 million possible combinations
- Smart anti-collision mechanism supports multiple simultaneous transmissions
- 9V nickel cadmium rechargeable backup battery
- Compact and easily installed

SecureSoft

Ceasefire Pro Wireless System's software, SecureSoft is your window into your premises when an alert is sounded. Once the Control Panel has activated the central server and you have been alerted by SMS, MMS and email, you can log on using your protected password and view live footage of your home. In short, geography no longer separates you from your premises. All you need to stay connected is the Internet.
