

**Turn your home into a fortress**

**SECURITY SYSTEM**

**CEASE  
FIRE**

## Three things the average burglar knows about you:

The layout of your building

The easiest way to break in

Where you keep your valuables

Contrary to popular belief, most burglaries are not random, unplanned acts. In most cases, the burglar is someone who has observed you over time: a former household help or even your ex-watchman could be a potential threat.

He knows your property, the people in it and in many cases, their routine. As for your valuables, every experienced burglar knows where to find them: drawers, cupboards and safes.

### So how can you protect yourself against even the most calculated attack?

With Ceasefire's security system.

With this system you can leave your home confident that a break-in will automatically sound an alarm, activate a response, and inform you via your telephone. Motion detectors, sirens, magnetic contacts and curtain detectors alert you the second an intruder breaks in. Flood and smoke detectors alert you in case of flooding and fire. And the central control panel monitors the overall security of your home. This system leaves no corner unguarded.

Turn your premises into a futuristic fortress that's impossible to break into.

# The Ceasefire Security System Demystified

## The Control Panel

The control panel is the heart of the system. It controls all the devices on your premises. And in case of an emergency, it alerts you by dialling preset numbers.

## Smoke Detectors

Ceasefire's smoke detectors alert the control panel as soon as they detect a trace of smoke, giving you enough time to fight a fire.

## Motion sensors

Motion sensors beam rays of infrared light and raise an alarm if they are crossed.

## Magnetic contacts

Magnetic contacts are attached to doors and their frames. The system raises an alarm if the door is forced open thus snapping the magnetic contact.

## Wired Siren

The wired siren sounds an alarm, in case of any sensor detecting an event.

## Curtain Detectors

Curtain detectors create a protective boundary around the curtains in your home. The detector's advanced motion analysis feature enables it to distinguish human motion from other disturbances, such as breeze.

## Other Products

### Key Fob

The key fob is a remote switch used to arm or disarm the system as you leave or enter your home.

### Wristband Transmitters

The wristband transmitters are ideal for elderly people at home.

### Remote Commander

The Remote Commander is like a mini control panel that allows you to operate the main control panel from anywhere within your home.

# Is your property safe?

If your answer is yes, keep in mind that most victims of crime thought so too. After all, it's only human to think that crime only affects 'other people'.

However, at Ceasefire, we aim to provide you with that sense of unshakeable security with this system.

It's time to take your protection in your hands.

**Your security is just a phone call away.**
